[Variables](#)

Responsive images

Images in Bootstrap are made responsive with `.img-fluid`. This applies `max-width: 100%;` and `height: auto;` to the image so that it scales with the parent width.

Responsive image

```

```

Image thumbnails

In addition to our [border-radius utilities](#), you can use `.img-thumbnail` to give an image a rounded 1px border appearance.

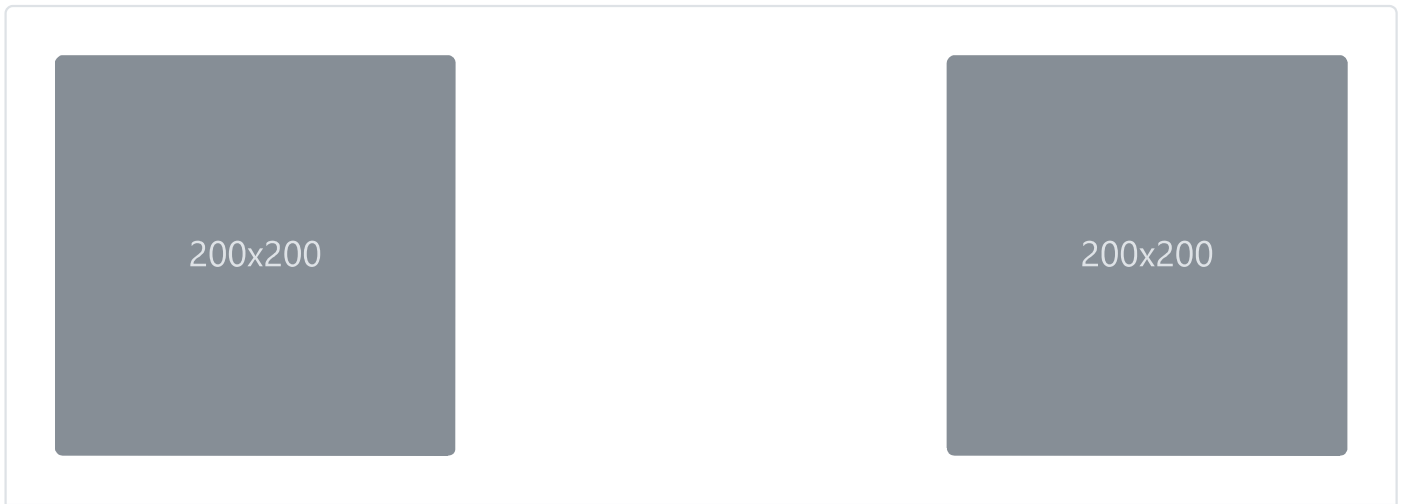

```

```

Aligning images

Align images with the [helper float classes](#) or [text alignment classes](#). `block`-level images can be centered using [the `.mx-auto` margin utility class](#).

```
  

```

```

```

```
<div class="text-center">  
    
</div>
```

</div>

Picture

If you are using the `<picture>` element to specify multiple `<source>` elements for a specific ``, make sure to add the `.img-*` classes to the `` and not to the `<picture>` tag.

```
<picture>
  <source srcset="..." type="image/svg+xml">
  
</picture>
```

Sass

Variables

Variables are available for image thumbnails.

<code>\$thumbnail-padding:</code>	<code>.25rem;</code>
<code>\$thumbnail-bg:</code>	<code>\$body-bg;</code>
<code>\$thumbnail-border-width:</code>	<code>\$border-width;</code>
<code>\$thumbnail-border-color:</code>	<code>\$gray-300;</code>
<code>\$thumbnail-border-radius:</code>	<code>\$border-radius;</code>
<code>\$thumbnail-box-shadow:</code>	<code>\$box-shadow-sm;</code>

Designed and built with all the love in the world by the Bootstrap team with the help of our contributors.

Code licensed MIT, docs CC BY 3.0.

Currently v5.1.3.
