Floating labels

Create beautifully simple form labels that float over your input fields.

- Selects
- Layout
- Sass
 - Variables

Example

Wrap a pair of `<input class="form-control">` and `<label>` elements in `.form-floating` to enable floating labels with Bootstrap's textual form fields. A `placeholder` is required on each `<input>` as our method of CSS-only floating labels uses the `:placeholder-shown` pseudo-element. Also note that the `<input>` must come first so we can utilize a sibling selector (e.g., `~`).

```
<div class="form-floating mb-3">
  <input type="email" class="form-control" id="floatingInput" placeholder="name@exam
  <label for="floatingInput">Email address</label>
</div>
<div class="form-floating">
  <input type="password" class="form-control" id="floatingPassword" placeholder="Pas
  <label for="floatingPassword">Password</label>
</div>
```

When there's a `value` already defined, `<label>`s will automatically adjust to their floated position.

Input with value
test@example.com

```
<form class="form-floating">
  <input type="email" class="form-control" id="floatingInputValue" placeholder="name
  <label for="floatingInputValue">Input with value</label>
</form>
```

Form validation styles also work as expected.

Invalid input
test@example.com

```
<form class="form-floating">
  <input type="email" class="form-control is-invalid" id="floatingInputInvalid" plac
  <label for="floatingInputInvalid">Invalid input</label>
</form>
```

Textareas

By default, `<textarea>`s with `.form-control` will be the same height as `<input>`s.

```
<div class="form-floating">
  <textarea class="form-control" placeholder="Leave a comment here" id="floatingText"
  <label for="floatingTextarea">Comments</label>
</div>
```

To set a custom height on your `<textarea>`, do not use the `rows` attribute. Instead, set an explicit `height` (either inline or via custom CSS).

```
<div class="form-floating">
  <textarea class="form-control" placeholder="Leave a comment here" id="floatingText"
  <label for="floatingTextarea2">Comments</label>
</div>
```

Selects

Other than `.form-control`, floating labels are only available on `.form-selects`. They work in the same way, but unlike `<input>`s, they'll always show the `<label>` in its floated state. **Selects with size and multiple are not supported.**

```
<div class="form-floating">
  <select class="form-select" id="floatingSelect" aria-label="Floating label select"
  <option selected>Open this select menu</option>
  <option value="1">One</option>
```

```

<option value="2">Two</option>
<option value="3">Three</option>
</select>
<label for="floatingSelect">Works with selects</label>

```

Layout

When working with the Bootstrap grid system, be sure to place form elements within column classes.

Email address
mdo@example.com

Works with selects
Open this select menu

```

<div class="row g-2">
  <div class="col-md">
    <div class="form-floating">
      <input type="email" class="form-control" id="floatingInputGroup" placeholder="n
      <label for="floatingInputGroup">Email address</label>
    </div>
  </div>
  <div class="col-md">
    <div class="form-floating">
      <select class="form-select" id="floatingSelectGrid" aria-label="Floating label
        <option selected>Open this select menu</option>
        <option value="1">One</option>
        <option value="2">Two</option>
        <option value="3">Three</option>
      </select>
      <label for="floatingSelectGrid">Works with selects</label>
    </div>
  </div>
</div>

```

Sass

Variables

```
$form-floating-height: add(3.5rem, $input-height-border);
$form-floating-line-height: 1.25;
$form-floating-padding-x: $input-padding-x;
$form-floating-padding-y: 1rem;
$form-floating-input-padding-t: 1.625rem;
$form-floating-input-padding-b: .625rem;
$form-floating-label-opacity: .65;
$form-floating-label-transform: scale(.85) translateY(-.5rem) translateX(.15rem);
$form-floating-transition: opacity .1s ease-in-out, transform .1s ease-in-out
```

Designed and built with all the love in the world by the Bootstrap team with the help of our contributors.
